SITUATION SUMMARY

Boil Water Order , Escondido, San Diego County (Update)

- The Boil Water Notice includes Palomar Health Center. The Regional Disaster Medical Health Specialist (RDMHS) for Region VI is in contact with the hospital and issues medical situation reports every twelve hours. The hospital is using canned and bottled water, paper plates and disposal cups as a precaution. Testing continues but the RDMHS VI advises Saturday's testing was negative for coliform bacteria. The SDO continues to monitor the situation and coordinating with the San Diego County OES Duty Officer and the RDMHS VI.
- The Cal OES Southern Duty Officer advised of a Boil Water Notice has been ordered for the City and Unincorporated areas of Escondido, San Diego County due to the appearance of a buildup of coliform bacteria. Rincon del Diablo Water District is advising residents in District ID 1, Pressure Zone 3 to use boiled tap water or bottled water for drinking or cooking purposes as a safety precaution.
- Rincon del Diablo Water District has reported that over 40 samples have been taken and is currently looking to what caused the coliform bacteria. This is a standalone Water Quality issue and is not related to the Drought in California. This incident has attracted local media attention.
- State Water Boards Drinking Water Program (DWP) Duty Officer advised through his Regional contact that these types of notices are routine work for a district office and can be lifted by Sunday evening at the earliest. Cal OES Southern Region continues to stay in contact with San Diego County.
- There are no requests for assistance or unmet Access and Functional Needs issues.

SITUATION SUMMARY

City of Needles Severe Weather Incident, San Bernardino County (No Change)

Situation

On Tuesday, August 12, 2014 at approximately 1630 hours a severe thunderstorm settled over the City of Needles causing flooding and wind damage. The City of Needles reported a minimum of 50 downed power lines, damage to roofs, and multiple downed trees. A determination has yet to be made if this incident may be linked to the August Severe Weather Incident.

- A local proclamation was received August 14, 2014 from the City of Needles for heavy rain, flooding and adverse weather conditions. The Proclamation is requesting a Governor's Proclamation including CDAA, a Small Business Administration declaration and any State or Federal funding. Initial damage estimates continue.
- Initial Damage Information has been received for the City of Needles. Crews are still out and the damage information may change. Current Public Assistance damage is just over \$2.3 million including personnel overtime costs and estimated costs of Debris Removal (Category A), Road and Bridge Systems (Category C) and Public Utilities (Category F). Individual Assistance damage includes 15 homes and one business destroyed, and 250 homes affected.

Road Closures

County Road Closures

- Five Mile Station Road from I-40 west to Highway 95 in the area of Needles, no anticipated time for reopening.

Port of Oakland Protest (Update)

On 8/17/14 at 1633 hours, the Cal OES Law Enforcement Duty Officer spoke to an OPD Lt., who advised that the ship is in route with an ETA into the Port of Oakland in the next 1/2 hour or so. There has been no significant social media traffic about another protest today. OPD is operating with a skeleton crew with no expectation for a LEMA request. OPD has provided the LDO with the Operations Commander contact for updates regarding the status of the scheduled entry of the ship into the Port and whether there is any protest activity at/near the Port. At 1640 hours the LDO contacted an OPD Captain who advised the ship is passing under Bay Bridge at this moment. OPD has Units monitoring the movement along with the Coast Guard. OPD restated what Lt. Lau advised, in that there has been very little social media activity and there is no evidence of any gatherings downtown or elsewhere to indicate an imminent march/protest.

- SOC / Inland REOC remains activated in support of 2014 Drought

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES: http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

NORTHERN CALIFORNIA:

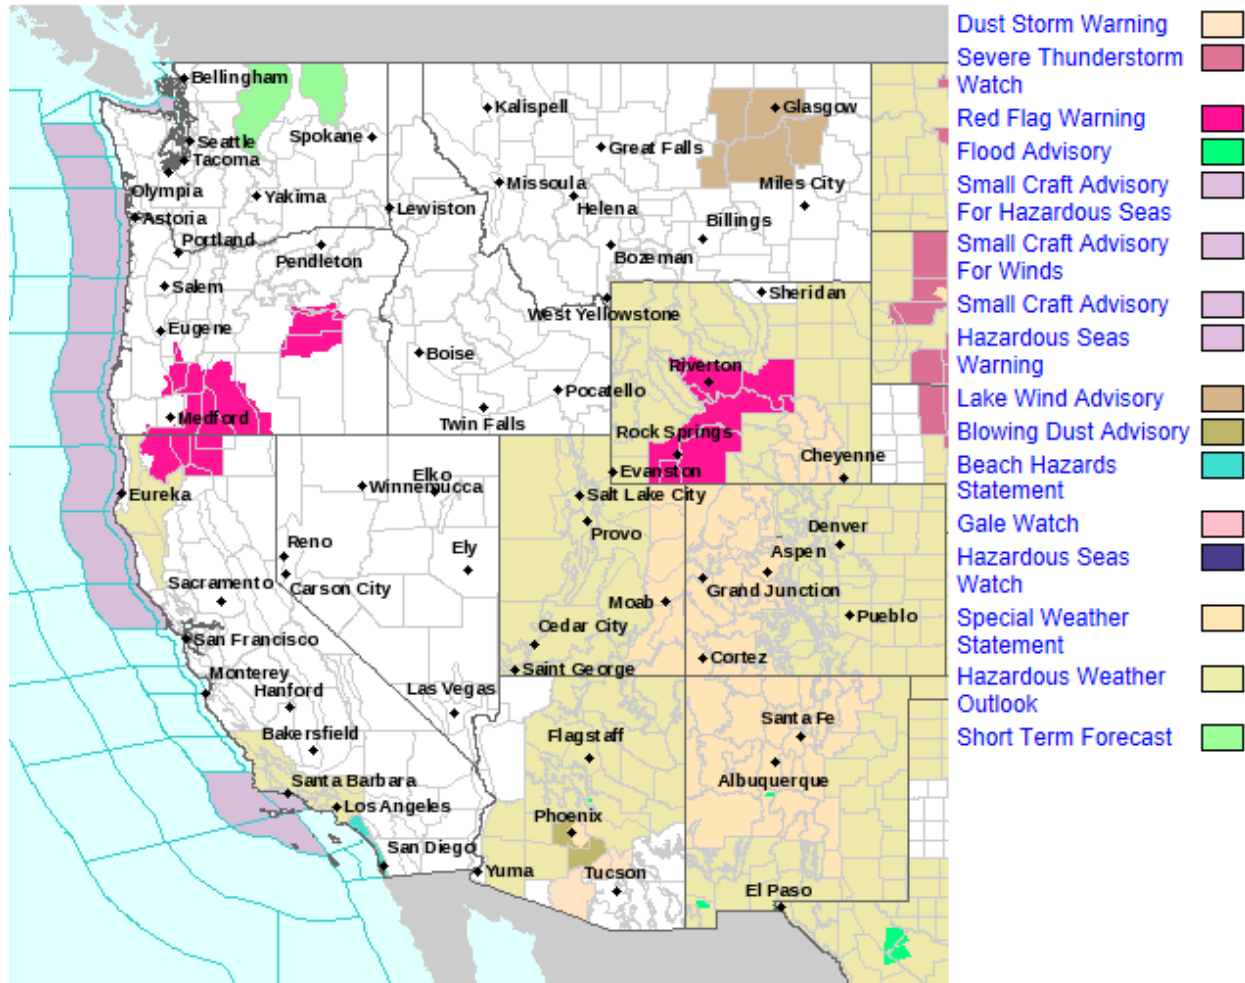

Another seasonably warm/dry day across the region, except for the immediate coast where a deep marine layer lingers. However, a new low pressure system is forming over Oregon today and computer models continue to drop this system southward right along the California coast late tonight into Mon-Tue. This low is not connected to the deep monsoonal moisture to the southeast, so any thunderstorms will probably have only light to locally moderate rainfall amounts. We are also coming out of a few seasonably hot/dry days across the region. At this time the most favored areas of thunderstorm activity will be in northwest California near the Oregon border late today, but only widely scattered activity. Thunderstorm coverage increases Monday afternoon across the northwest mountains and even into parts of the North Coast as the upper low tracks southward right over those areas. There will be some isolated lightning a bit further east, towards the Siskiyou/Modoc county line, but activity there should be more isolated. Same holds true for far northern Mendocino county further south. The low is expected to push southward past the Bay Area on Tuesday, bringing diminishing Thunderstorm chances for the rest of the week. A return to seasonably warm/dry weather for the latter half of this coming week, along with some light northeast/offshore winds. Winds today will be mainly south to west across most areas at about 7-15 mph, except gusts in the mid 20's over eastern areas. The marine layer is moderately deep at near 1500 feet which will keep low clouds and patchy fog in place, but daytime clearing back to near the beaches will also occur.

SOUTHERN CALIFORNIA:

High pressure over the Desert Southwest will cause temperatures to remain around 5 degrees above normal and minimum humidity to be the single digits and teens away from the coastal areas today. An area of low pressure currently off the Pacific Northwest Coast will drop southward and be off the southern California Coast by Wednesday. This low will bring a significant cooling trend and an increase in humidity to the region Monday through Wednesday. Depending on the exact track of the low pressure area, there may be a chance of showers and thunderstorms across the Sierra starting Tuesday afternoon and over southern California starting Wednesday afternoon. Any shower or thunderstorm activity that may develop will most likely end by Thursday evening. The low will move westward further into the Pacific Ocean allowing a ridge to build into California from the east bringing a warming and drying trend to the region Friday through next weekend.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 14th : Don Pedro 42%; Exchequer 18%; Folsom Lake 40%; Lake Oroville 33%; Millerton Lake 48%; New Melones 25%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 32%; Pyramid Lake 94%; and Castaic Lake 45%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.

- Cal OES continues to gather drought-related costs from state agencies and local governments.
